CADS / DATA AUTOMATION

# Reimagining CADS brand identity & Experience

## PROJECT BRIEF

Tech firm required a modernized visual identity that aligned with its core offerings. The objective, to reposition the brand as a forward-thinking, technically proficient, and scalable solutions provider while maintaining clarity and simplicity in its visual communication.

CADS

/ brand Identity / web presence / ui experience

## OPPORTUNITY

The tech market moves fast, but the previous Cads brand and manual data interfaces limited market adoption and user trust. An opportunity arose to design a trusted, modern brand identity and a streamlined, automated web UI that allowed stakeholders to hit the market running and manage data services efficiently.

## CHALLENGE

Cads offers powerful data services but lacked a clear digital identity and a streamlined interface to demonstrate its value, creating friction for potential early adopters trying to under -stand the product.
